Subject: EPA WaterSense Hydrowise-Ready Controllers

To whom it may concern,

The United States Environmental Protection Agency has a program of certifying products under the WaterSense program.

WaterSense labeled products are backed by independent, third-party certification and meet EPA's specifications for water efficiency and performance. When you use these water-saving products in your home or business, you can expect exceptional performance, savings on your water bills, and assurance that you are saving water for future generations.

Hydrawise-enabled controller models HC, HPC, PHC, HCC, and X2 with wi-fi module WAND, are EPA WaterSense certified irrigation controllers. Unlike traditional controllers that may require the addition of an external weather or rain sensor to meet efficiency standards, Hydrowise-ready controllers achieve the EPA WaterSense certification with no additional external devices required.

Mara McCartney

Category Manager - Hydrowise

A handwritten signature in blue ink that reads "Mara McCartney". The signature is fluid and cursive, with the first name "Mara" and last name "McCartney" clearly distinguishable.
