ARMONIA[®]

NEW PRODUCT

Harmony is sustainability.

The irrigation system designed
to seamlessly blend with its surroundings.

The Armonia[®] irrigation system

Armonia[®] is the irrigation system designed to **seamlessly blend with its surroundings**.

Ideal for gardens, public parks, home vegetable patches, nurseries, and greenhouses, as well as terraces, balconies, and pools, Armonia[®] irrigation system **unites the functionality and sustainability** of drip irrigation with an elegant, discreet design.

With colors carefully selected to **integrate harmoniously into various environments**, Armonia's palette complements its surroundings while enhancing aesthetic appeal.

Like all Irritec products, Armonia[®] irrigation system stands out for its **durability, premium materials, and high-performance efficiency**.

THE BEAUTY OF DISCRETION

Designed to enhance the natural beauty of gardens and fields, Armonia[®] irrigation system blends into the environment, delivering the high-standard irrigation that defines Irritec products. Available in various shades, Armonia's color choices create a visually harmonious look in any setting.

BUILT TO LAST

Made with top-quality materials, Armonia[®] irrigation system ensures reliable, long-lasting performance over time.

HEAT REDUCTION

The colors used in the Armonia[®] irrigation system reduce heat absorption, improving the thermal management of irrigation. An insulating layer inside the tubing helps to maintain stable water temperatures by reducing excessive heat.

Irrigate with elegance and environmental harmony

Designed with Irritec's exclusive Camo® texture, the Armonia® system seamlessly blends into any environment. Available in three elegant finishes - Bamboo, Nut, and Pearl - it offers the perfect balance of functionality and aesthetics.

BROWN NUT

GREEN BAMBOO

WHITE PEARL

DISCOVER THE COMPLETE SYSTEM

The Armonia® irrigation system includes drip lines, online emitters, connectors, filters, and all necessary components to build a fully efficient irrigation system.

ALSO AVAILABLE IN BIOSPIRIT VERSION

Produced with alternative raw materials to traditional polyolefins, this version of Armonia reduces fossil resource usage, contributing to environmental sustainability.

Drip irrigation evolves with Armonia®

Sustainability now enhances the beauty of agricultural fields and gardens, combining water savings with minimal visual impact, blending seamlessly into the surrounding environment.
